PROJECTS

Freelance Portfolio Page

This was a custom portfolio I built for an imaginary company. This was my first attempt at using bootstrap in styling a website. It displays my interest in learning how to use new technologies for different scenarios if the need arises.

- *Technologies used: Bootstrap, Javascript, Sass.*
- **GitHub Repo**

The Anime Database Application

A React web application that makes use of the Jikan Anime Api to allow users search for their favourite anime shows. React hooks and components were used to dynamically output the search results and to manage the state of the components.

- *Technologies used: ReactJs, API, React Hooks, SASS.*
- **GitHub repo** 

Sunnyside agency Landing page

A landing page for an agency that specializes in photography and graphic designing. This taught me how to adopt a mobile first-workflow and to strive for pixel perfect websites built from a design.

- *Technologies used: Sass, Javascript, Mobile-first workflow, CSS-grid, flexbox.*
- **GitHub Repo** 

SKILLS

Frontend

Javascript
SASS
Bootstrap
React.js

Backend

Node.js

Others

Version Control / Git
Object Oriented
Programming

Soft skills

Critical Thinker
Team player
Great communicator

EDUCATION

Pan-Atlantic University, BSc, Business Administration

- CGPA - 4.52 (First class honours)
- Relevant courses: Management Information Systems, Introduction to Computer science, Statistics.
- Introduction to Programming.

2015 – 2019
Lagos, Nigeria
