🗂 PROJECTS

Freelance Portfolio Page ⬈

This was a custom portfolio I built for an imaginary company. This was my first attempt at using bootstrap in styling a website. It displays my interest in learning how to use new technologies for different scenarios if the need arises.
- *Technologies used: Bootstrap, Javascript, Sass.*
- **GitHub Repo**

Loopstudios Landing Page ⬈

A landing page for a Virtual Reality company that specializes in making digital products. The site was built to be responsive at all screen sizes. I also made use of design files from the Front-end mentor and coded the site from the ground up to look as identical as the design image.
- *Technologies used: Sass, Javascript, Mobile-first workflow, CSS-grid, flexbox.*
- **GitHub repo** ⬈

Sunnyside agency Landing page ⬈

A landing page for an agency that specializes in photography and graphic designing. This taught me how to adopt a mobile first-workflow and to strive for pixel perfect websites built from a design.
- *Technologies used: Sass, Javascript, Mobile-first workflow, CSS-grid, flexbox.*
- **GitHub Repo** ⬈

🧠 SKILLS

Frontend	**Backend**	**Others**	**Soft skills**
Javascript	*Node js*	*Version Control / Git*	*Critical Thinker*
SASS			*Team player*
Bootstrap			*Great communicator*
React js
